EDUCATION

B.Tech — Artificial Intelligence and Data Science 2021–2025
Knowledge Institute of Technology CGPA: 7.5

Class XII 2020–2021
Kailash Maansarovar School 78%

TECHNICAL SKILLS

Programming: Python, SQL

Data Engineering: ETL Pipelines, Data Transformation, Data Cleaning, Data Validation, Data Modeling

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib

Tools: MySQL, Jupyter Notebook, VS Code, Git

Machine Learning: Random Forest, Logistic Regression, Feature Engineering, Cross-Validation, Model Evaluation

Visualization: Power BI, Excel

Concepts: Aggregations, Joins, Indexing, Structured Data Processing, Performance Optimization

INTERNSHIPS

BDreamz Global Solutions Pvt. Ltd., Electronics City Jun 2025 – Jan 2026
Data Science & AI Intern

- Designed and optimized ETL workflows using Python and SQL to transform structured datasets for analytics and KPI reporting.
- Built data transformation pipelines involving joins, aggregations, filtering, and validation to improve reporting accuracy.
- Developed Power BI dashboards integrated with processed datasets, reducing manual reporting effort and improving data visibility.

VIBA, Coimbatore Feb 2023 – Apr 2023
Data Science Intern

- Created structured data flow documentation and implemented data cleansing pipelines for improved consistency.
- Performed dataset normalization and transformation to enhance system efficiency.
- Automated preprocessing steps for structured analytics workflows.

Cloudy Nest, Salem Aug 2022 – Sep 2022
Machine Learning & Python Intern

- Processed and transformed raw datasets using Pandas and NumPy for structured analytical use cases.
- Applied feature engineering and normalization to prepare clean datasets for predictive modeling.
- Developed reusable Python scripts for data extraction, cleaning, and structured storage.

CERTIFICATIONS

- Data Science Masters Program — Besant Technologies (2026)
- Data Science & AI — FutureSkills Prime (2026)
- Azure Data Fundamentals - Microsoft (2026)

PROJECTS

Student Performance Monitoring & Placement Analytics System

May 2025

Team Project

- Designed and implemented an end-to-end ETL pipeline to ingest and transform 250+ student academic and placement records using Python-based workflows.
- Generated 20+ analytical features from academic and placement datasets, improving predictive performance and enabling better student placement analysis.
- Achieved 88% classification accuracy using Random Forest (baseline Logistic Regression: 82%) with 5-fold cross-validation score of 86%, while engineering feature generation and placement rate computation logic.

AI Tool Recommendation System

May 2024

Team Project

- Processed and transformed user preference datasets using Python and Pandas for structured recommendation analysis.
- Developed feature transformation and filtering pipelines to improve recommendation relevance and data quality.
- Implemented a recommendation workflow that matched user requirements with suitable AI tools, reducing manual search effort by approximately 70%.
