EXECUTIVE SUMMARY

Data professional with hands-on experience in ETL pipeline development, data analytics, machine learning, and NLP through industry internships and applied projects. Skilled in Python, SQL, Power BI, and Snowflake, with a strong focus on building scalable, data-driven solutions.

INTERNSHIPS

BDreamz Global Solutions Pvt. Ltd. Jun 2025 – Jan 2026

Data Science & AI Intern

- Designed and optimized ETL workflows using Python and SQL to transform structured datasets for analytics and KPI reporting.
- Built scalable data transformation pipelines involving joins, aggregations, filtering, and validation, improving reporting accuracy.
- Developed Power BI dashboards integrated with processed datasets, reducing manual reporting effort by approximately 40%.

VIBA, Coimbatore

Feb 2023 – Apr 2023

Data Science Intern

- Built automated data pre-processing pipelines for structured analytics projects, cutting manual preparation time.
- Implemented data cleaning, normalization, and transformation techniques improving dataset consistency.
- Standardized pre-processing steps into a reusable workflow adopted across subsequent analytics tasks.

Cloudy Nest, Salem

Aug 2022 – Sep 2022

Machine Learning & Python Intern

- Processed and transformed raw datasets using Pandas and NumPy to support predictive modeling.
- Applied feature engineering and normalization techniques to prepare clean, model-ready datasets.
- Built reusable Python scripts for data extraction, cleaning, and structured storage.

PROJECTS

ResumeIQ

Jul 2026

Individual Project

- Built an NLP pipeline using spaCy and regex-based pre-processing to extract, clean, and lemmatize resume/JD text.
- Engineered a dual-scoring system combining TF-IDF cosine similarity and transformer-based sentence embeddings, with a 200+ term skills taxonomy for skill-gap detection.
- Managed project setup, environment configuration, and version control using Git Bash, including virtual environment management and GitHub repository deployment.

Student Performance & Placement Analytics

May 2025

Team Project

- Designed an end-to-end ETL pipeline to ingest and transform 250+ student academic and placement records.
- Generated 20+ analytical features, improving predictive performance for placement analysis.
- Achieved 88% classification accuracy using Random Forest (baseline Logistic Regression: 82%), 5-fold CV score: 86%.

AI Tool Recommendation System

May 2024

Team Project

- Processed and transformed user preference datasets using Python and Pandas for structured recommendation analysis.
- Developed feature transformation and filtering pipelines to improve recommendation relevance and data quality.
- Implemented a recommendation workflow matching user requirements to AI tools, reducing manual search effort by approximately 70%.

EDUCATION

B.Tech — AI & Data Science

Knowledge Institute of Technology

2021–2025 — CGPA: 7.5

TECHNICAL SKILLS

Programming: Python, SQL

Data Engineering: ETL Pipelines, Data Modeling, Structured Data Processing, Joins, Aggregations

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib

Tools: MySQL, Jupyter Notebook, VS Code, Git

Machine Learning: Random Forest, Logistic Regression, Feature Engineering, Cross-Validation, Model Evaluation, Regression, Classification

Visualization: Power BI, Excel

Data Analytics: EDA, Statistical Analysis, Hypothesis Testing, Data Cleaning, Data Validation, Data Transformation

Emerging Tech: NLP, Snowflake, Prompt Engineering

CERTIFICATIONS

- Data Science Masters Program — Besant Technologies (2026)
- Data Science & AI (Gold – 84%) — FutureSkills Prime (2026)
- Azure Data Fundamentals — Microsoft (2026)
